

Embedding Calendly in Wix Site

Create a container box in Wix and change the ID to handlCalendly

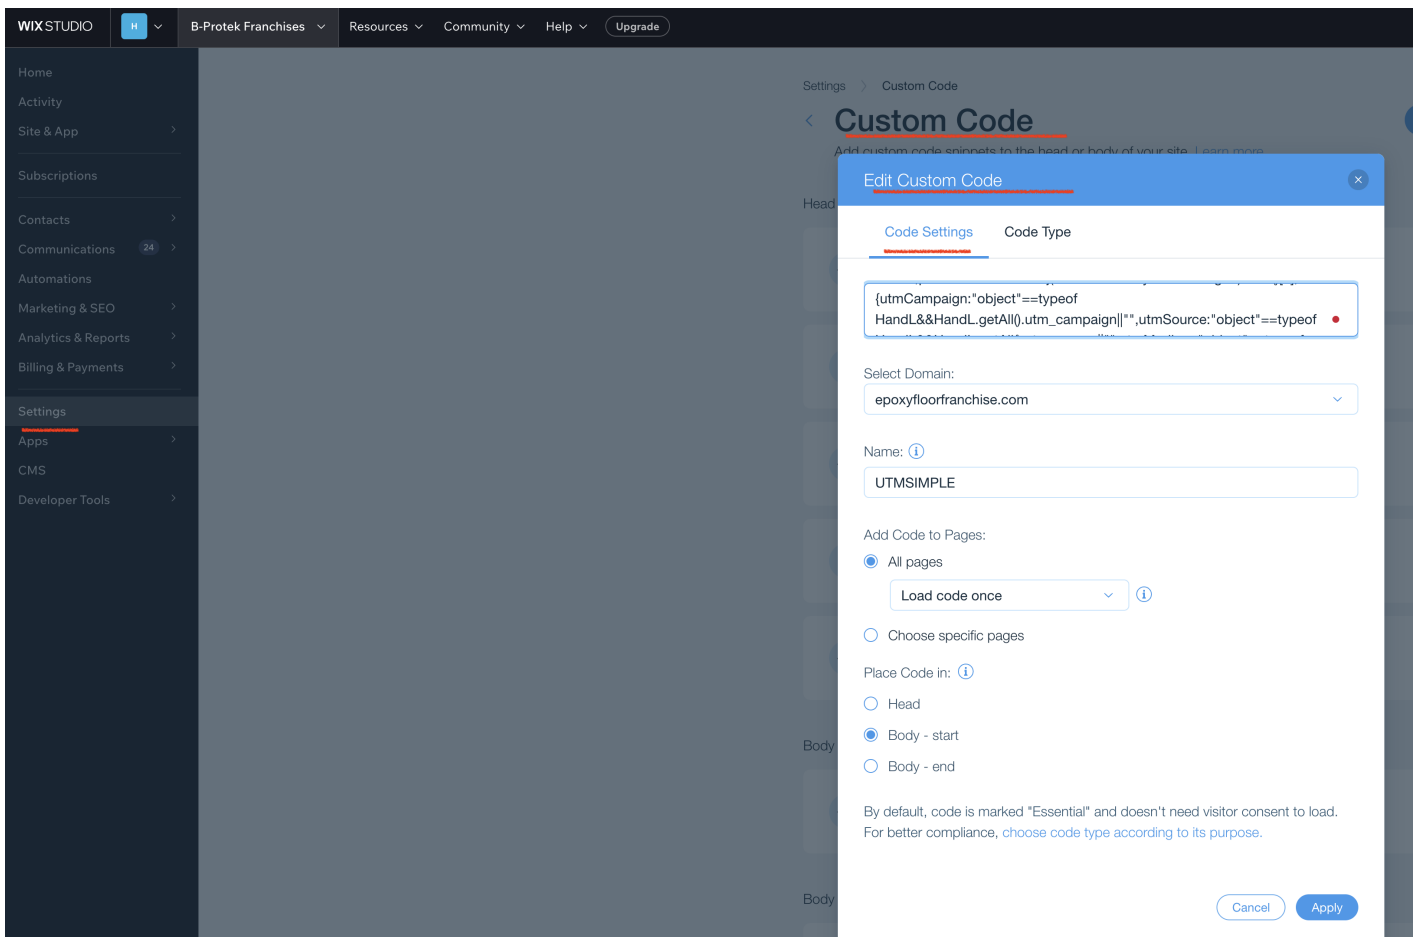

After that, open the page velo section and copy paste this

```
import wixWindowFrontend from 'wix-window-frontend';

$w.onReady(function () {
  $w("#handlCalendly").classList.add("calendly-inline-widget")
  wixWindowFrontend.postMessage(' HandlCalendly' );
})
```

And finally in global settings, go to Custom Code section and copy paste the code below:

```
window.onmessage = function(event) {  
  if (event.data == 'HandLCalendly'){  
    setTimeout(function(){  
      Calendly.initInlineWidget({  
        url: 'https://calendly.com/YOUR_LINK/30min',  
        parentElement: document.getElementById('handLCalendly'),  
        utm: {  
          utmCampaign: typeof HandL == 'object' && HandL.getAll()['utm_campaign'] ||  
            "",  
          utmSource: typeof HandL == 'object' && HandL.getAll()['utm_source'] ||  
            "",  
          utmMedium: typeof HandL == 'object' && HandL.getAll()['utm_medium'] ||  
            "",  
          utmContent: typeof HandL == 'object' && HandL.getAll()['utm_content'] ||  
            "",  
          utmTerm: typeof HandL == 'object' && HandL.getAll()['utm_term'] ||  
            ""  
        }  
      });  
    }, 1000);  
  }  
}
```

```
}
```

```
};
```
