

# UTM Tracking in Calendly using initInlineWidget

Please insert the following code. Make sure replacing the URL with yours.

```
<!-- Calendly inline widget begin -->
<div id="handlCalendly" class="calendly-inline-widget" style="min-width: 320px; height: 580px; "
data-auto-load="false">
<script type="text/javascript"
src="https://assets.calendly.com/assets/external/widget.js"></script>

<script>
setTimeout(function(){
    Calendly.initInlineWidget({
        url: 'https://calendly.com/YOUR_LINK/30min',
        parentElement: document.getElementById('handlCalendly'),
        utm: {
            utmCampaign: typeof HandL == 'object' && HandL.getAll()['utm_campaign'] ||
"",
            utmSource: typeof HandL == 'object' && HandL.getAll()['utm_source'] ||
"",
            utmMedium: typeof HandL == 'object' && HandL.getAll()['utm_medium'] ||
"",
            utmContent: typeof HandL == 'object' && HandL.getAll()['utm_content'] ||
"",
            utmTerm: typeof HandL == 'object' && HandL.getAll()['utm_term'] || ""
        }
    });
}, 1000);
</script>
</div>
```

For Popup you can use this...

```
<link href="https://assets.calendly.com/assets/external/widget.css" rel="stylesheet">
<script src="https://assets.calendly.com/assets/external/widget.js" type="text/javascript">
```

```
async<</script>
<a href="#" class="button" onclick="Calendly.initPopupWidget({url:
' https://calendly.com/YOUR_LINK/30min', utm: { utmCampaign: Cookies.get("utm_campaign"),
utmSource: Cookies.get("utm_source"), utmMedium: Cookies.get("utm_medium"), utmContent:
Cookies.get("utm_content"), utmTerm: Cookies.get("gclid") }});return false;">Prendre rendez-
vous</a>
```
