

# Tracking UTMs in ActiveCampaign on Kajabi

Add the following script to your Kajabi page

This script assumes the form field name matches with UTMSimple's cookie name [What can I track with UTMSimple?](#)

```
<!-- Global site UTM Simple Tracking Start-->
<script>
var handl_custom_params=[]
var handl_js = document.createElement("script");
handl_js.setAttribute("src", "https://track.utmsimple.com/utm.js?license=<license_key>"),
document.head.appendChild(handl_js),
handl_js.onload = function() {
  let fields = HandL.getAll()
  for (field of Object.keys(fields)) {
    if (Cookies.get(field) != undefined) {
      handlj('input[name="'+field+'"]').val(Cookies.get(field))
    }
  }
};
</script>
<!--Global site UTM Simple Tracking End -->
```
