Adding Hidden Fields to Your Checkout Page

Edit your checkout page (Design) and add all the custom fields you've added in Step 1, as shown in the image below.

```

    setTimeout(
      function() {
        jQuery("[ id*=' custom' ]").map((i, v) => {

          let key = $(v).next().html()
          let c_val = data[key]

          if (c_val) {
            $(v).val(c_val)
          }
        })
      }, 1000
    );

    $(document).ready(function() {
      jQuery("[ id*=' custom' ]").map((i, v) => {
        jQuery(v).parent().parent().parent().hide()
      })
    })
  };
</script>
<!-- Global site UTM Simple Tracking End-->

```
